About

I'm a Computer Science Engineering student with a strong interest in web development and backend engineering. I enjoy turning ideas into working products, from building clean, responsive interfaces to designing the logic and databases that power them behind the scenes. I learn best by building, and I'm constantly working on projects to sharpen my skills and understand how real-world applications work end to end. I'm currently looking for internships and opportunities where I can contribute, learn from experienced developers, and grow as an engineer. Always happy to connect with fellow developers, learners and recruiters, so feel free to reach out
